

April 26, 1949.

Dear Francis,

I just noticed that our names appear on the same list for the Shelter Island Conference on the Gene, end of next month. It will be fun to have a chance to talk to you again.

I'm writing now to ask how you propose to go out there; it is too soon to say when. If you were driving, I might be able to catch a plane that would intercept you at Laguardia airport, if this wouldn't be too much to ask. The trip on the LIRR promises to be the worst part of reaching the conference from Madison.

See you then,

best regards,

Joshua
